PROFESSIONAL SUMMARY

Software Engineer with 2+ years delivering production Java Full Stack microservices and event-driven systems across FinTech and Healthcare at Endava Solutions. Built 25+ REST APIs across 4 microservices; integrated LangChain/LangGraph GenAI workflows cutting manual processing by ~30%. Skilled in Spring Boot, gRPC, Redis, Amazon SQS/SNS, React.js, Docker, and GitLab CI/CD.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Core Java: OOP, Collections, Multithreading, Streams, Lambda Expressions, Exception Handling, Design Patterns, DSA

Frameworks: Spring Boot, Spring Security, Spring MVC, Spring Web Flux, Spring Data JPA, Hibernate (JPA), REST API, gRPC (Protobuf), Reactive Programming

Frontend: React.js, HTML5, CSS3, Bootstrap

Databases & Caching: MongoDB, PostgreSQL, MS SQL Server, Apache Ignite, Redis

Cloud & Messaging: Amazon SQS, Amazon SNS, Amazon EC2, Amazon S3

DevOps: Docker, GitLab CI/CD, Git, GitHub, Nginx

Architecture: Microservices, Event-Driven Architecture, SOLID Principles, Dependency Injection, System Design

AI / GenAI: LangChain, LangGraph, LLM Workflow Integration, Prompt Engineering

Tools & Testing: IntelliJ IDEA, Postman, Maven, JIRA, JUnit, Unit Testing, Integration Testing, Linux

PROFESSIONAL EXPERIENCE

Endava Solutions (formerly GalaxE Solutions)

Aug 2024 – Present | Bangalore, India

Developer – Java Backend (Microservices) (Promoted from Associate Developer)

Financial Compliance Platform | FinTech | Java, Spring Boot, gRPC, Amazon ElastiCache (Redis), Amazon SQS/SNS, Amazon RDS (PostgreSQL), Docker, GitLab CI/CD

- Engineered a **feature computation microservice** computing **100+ deterministic derivations** over financial transaction data, powering 3+ compliance services and cutting pipeline execution time by **~35%**.
- Integrated **Amazon ElastiCache (Redis) caching** for configuration data and computed results, reducing database roundtrips by **~70%** and cutting feature retrieval latency from **~40ms to under 5ms**.
- Implemented **gRPC (Protobuf)** contracts across 3+ service boundaries and **Amazon SQS/SNS** async pipeline with DLQ retry, achieving **99.9% message delivery reliability** and ~40% smaller payloads.
- Containerized **5+ services** with Docker; configured **GitLab CI/CD** pipelines reducing deployment effort by ~80%; maintained **85%+ test coverage** with zero critical defects in production.

Associate Developer – Java Full Stack (React)

GxCapture — Enterprise Intent Management Platform | Healthcare & Life Sciences | Java, Spring Boot, MongoDB, LangChain, LangGraph, React.js, Docker

- Owned **4 Spring Boot microservices** exposing **25+ REST APIs** across 5+ downstream systems, enabling end-to-end automated decision handling for healthcare intent workflows.
- Built a custom **async outbound queue** eliminating synchronous downstream calls, improving pipeline throughput by **~3x** for high-volume intent processing.
- Integrated **LangChain and LangGraph** AI validation into workflow processing, automating **~30% of manual analyst steps** and reducing average workflow resolution time.
- Delivered **12–15 React.js components** cutting operations task completion time by ~25%; maintained **zero critical production defects** across all 2-week Agile sprint releases.

EDUCATION

B.Tech – Computer Science and Engineering

Jawaharlal Nehru Technological University (Kakinada) (JNTUK)

Dec 2020 – Apr 2024

CGPA: 8.73 / 10.0
